1.3. Questions

Game will ask 8 questions about Classic Board Games, each question may have different answering options, for some of them answer should be true or false, for some of them there can be multiple correct answer and player should choose all correct answers and also for others, there will be only one correct answer and user will be able to choose only one. In case of correct answer, answer will be highlighted with a green color and a green message box will appear with a congrats message, but in case of a wrong answer, this time, again correct answer(s) will be highlighted with green color background and answer of player will be highlighted with a red color background and again a message box with red borders will appear and give a message to player that says the answer is not correct. A question window, with a wrong answer message box is shown in Picture 1.3.

Picture 1.3. Question window in case of wrong answer selection

There is no time constraint to answer questions, when you select the answer that you believe, it is the correct answer, you can pass to next question by clicking on the “Next” button located on the right bottom corner. When you click on the button, the evaluation of your answer will take place and if it is correct, game will congrats you, otherwise, it will show the correct message. After evaluation process within 4 seconds, you will be directed to the next question. Each question should be answered to pass to the next question. If you do not choose any answer and click on the next button, game will ask you to choose an answer with a warning message box, as presented in Picture 1.4.
